I personally manage a expert training video production corporation and the GoPro 3 or more is the supreme love/hate connection.GoPro is performing a fair career regarding handling some of their firmware difficulties, but the battery life has become the one main downer.I aquired their own power bacpac which will really did not put significantly juices towards currently inadequate life of the battery.Then the bacpac just simply chosen to begin living.Then I have a crate for that gopro having an outside Sony power which should theoretically allow it to go work for hours on end.Only after a couple of a long time, a GoPro may get too hot plus de-activate. My spouse and i very own loads of different Wasabi energy and they virtually all work efficiently.This particular the first is remarkably good plus helps make the GoPro truly functional.I am working that in time mistake way of Four hours today this is nevertheless planning.Currently 4x greater than the internal power and at very least, doubly good since the power supply bacpac.
